Re: Path from 5<sup>th</sup> Street to 72 Ave Back Alley

I wish to bring to your attention concerns I have regarding the path along the side of the proposed Whispers of Hope Community Kitchen that connects 5<sup>th</sup> Street to the back alley of the 72<sup>nd</sup> Avenue properties.

This path has a steep, narrow slope, with a deep trench on the side closest to Nick's Feed, which causes many slip and fall accidents. There have been many times I have witnessed kids, with a spotter for traffic on 5<sup>th</sup> Street, speed down this slope on their bicycles to the roadway and others ride motorized scooters up and down the hill. I expect there will be an increase in traffic, both foot and automobile, on the roadway below with the warming of the weather and intended opening of the Community Kitchen.

I would like to ask the path be blocked off at both ends to decrease the risk of injury on the slope and to those using the roadway below.

Thank you very much in advanced,

Sincerely,

Dianna Darling
